

SMART INDIA HACKATHON 2026

- **Problem Statement ID : Open Innovation**
- **Problem Statement Title : Atlas: Evidence-Driven**

Civic Intelligence and Public Accountability Platform

- **Theme : Miscellaneous**
- **PS Category : Software**
- **Team ID : SIH-496ALA**
- **Team Name : Debug Dynasty**

THE PROBLEM

Government records, court documents and public data remain **fragmented** across disconnected systems.

Citizens can find facts, but the **context is lost** across causes, history, responsibility and outcomes.

Promises, deadlines, public spending and outcomes are **rarely connected** in one place.

OUR SOLUTION : ATLAS

Atlas **connects government** records, court documents, research and citizen evidence into one investigation.

Atlas reconstructs each public problem from root cause to current status using **verified evidence**.

Atlas **tracks accountability** across promises, public money, institutions, outcomes and citizen action.

INNOVATION & UNIQUENESS

News tells you what happened. Atlas shows you the **ENTIRE PROBLEM**.

ARCHITECTURE OVERVIEW

DATA SOURCES

DATA INGESTION LAYER

ATLAS CORE PLATFORM

DATA STORAGE LAYER

APPLICATION LAYER

TECHSTACK

Frontend

Framework

AI/Ingestion backend

Task Queue

AI / ML

DevOps

METHODOLOGY

IDENTIFY ISSUE
Identify public issues and define scope & key questions.

COLLECT & PROCESS DATA
Collect data from multiple sources and process & extract information.

VERIFY & CONNECT
Cross-check facts, link evidence and build connections between entities.

ANALYZE & GENERATE INSIGHTS
Analyze patterns, causes and impact using AI and data models.

VISUALIZE & ENABLE ACTION
Visualize insights, track accountability and enable citizen action.

FEASIBILITY AND VIABILITY

FEASIBILITY

TECHNICALLY FEASIBLE

Built using proven web, AI and database technologies.

OPERATIONALLY PRACTICAL

Simple platform for citizens, researchers and institutions.

ECONOMICALLY VIABLE

Scalable infrastructure with sustainable revenue options.

SOCIALLY IMPACTFUL

Improves transparency, accountability and civic participation.

BUSINESS MODEL

INSTITUTIONAL SUBSCRIPTIONS

Annual licensing for government bodies, universities and public institutions to access advanced research and monitoring tools.

DATA & API SERVICES

License structured public-data datasets and APIs to researchers, media, civic-tech organisations and institutions.

RESEARCH & MONITORING

Paid issue, policy and accountability monitoring for journalists, NGOs, research organisations and professional users.

CHALLENGES & OVERCOMING STRATEGIES

AI Hallucination & Bias

Human review + evidence-backed verification

False & Unverified Citizen Inputs

Evidence requirements & verification queue

Legal & Reputational Risk

Claim classification + transparent corrections

Fragmented & Changing Data

Automated extraction + knowledge graph + monitoring

IMPACT AND BENEFITS

IMPACT

KEY BENEFITS

RESEARCH AND REFERENCES

REFERENCES

Open Government Data Platform India – India’s official open-data platform provides public datasets and APIs that Atlas can ingest and connect into issue investigations.

Supreme Court of India – The Supreme Court’s official portal provides judgments, orders, listings and court updates that can form the judicial evidence layer of Atlas.

National Judicial Data Grid (NJDG) – NJDG provides structured, drill-down judicial data that Atlas can use to track cases, delays and institutional outcomes.

CAG India – CAG audit reports provide primary evidence for tracking public spending, implementation failures and accountability

MapLibre – MapLibre provides open-source tools for building high-performance interactive maps and geospatial visualizations.

RESEARCH

Sr. No.	Research Paper	Summary
1	<u>Knowledge Graph Enhanced Heterogeneous Graph Neural Network for Fake News Detection</u>	Knowledge graphs improve relationship-based misinformation detection.
2	<u>Research on Detecting Future Fake News Based on Multi-View and Knowledge Graph</u>	Combines multiple information views with knowledge graphs for stronger detection.
3	<u>Knowledge Construction Based on Judicial Data with Social Media</u>	Knowledge Construction Based on Judicial Data with Social Media
4	<u>The EMPWR Platform: Data and Knowledge-Driven Processes for the Knowledge Graph Lifecycle</u>	Provides a scalable workflow for building and maintaining knowledge graphs from diverse data.
